

# EBHR

## EUROPEAN BULLETIN OF HIMALAYAN RESEARCH

---

### Call for dissertation abstracts

---

The *European Bulletin of Himalayan Research* (EBHR) was founded by the late Richard Burghart in 1991 and has appeared twice yearly ever since. It is edited on a rotating basis between France ([CNRS](#)), Germany ([South Asia Institute](#)) and the United Kingdom ([SOAS](#)). From 2019 to 2023, the EBHR is hosted at CNRS's Centre for Himalayan Studies in France.

The subjects covered by the journal range from geography and economics to anthropology, sociology, philology, history, art history, archaeology and history of religions. In terms of its geographical scope, the journal has published material that covers the Himalayas within a broad definition and not limited to the geological region, but taken to include the Karakorum, Hindukush, Ladakh, southern Tibet, Kashmir, north-west India, Nepal, Sikkim, Bhutan and North-East India.

We are pleased to introduce a **new feature** that will be published in the journal on a regular basis. It is our conviction that disseminating information about the work of young scholars in a timely manner is an important responsibility: we are therefore currently considering abstracts for PhD dissertations defended between 2017 and 2019.

Dissertations to be considered must fall within the geographical and disciplinary scope of the journal as detailed above. If you are interested in having your dissertation featured in the journal, please send us the following information:

- Full title information, institutional affiliation, and official date of viva voce
- Author's full name, and current affiliation (post-PhD)
- Name of main advisor
- Abstract of no more than 500 words (no less than 300)
- List of 5-6 keywords

Feel free to include any other relevant information such as a link to an institutional repository if the dissertation is available in digital format, or mention of a forthcoming publication based on the dissertation work.
